## Preliminaries

EE5182 Microcontrollers and Embedded Systems

## Course Outline

- 1. Introduction
- 2. Embedded design concepts and definitions
- 3. System architectures
- 4. Introduction to ARM core architecture
- 5. On-chip peripherals
- 6. Basic embedded programming
- 7. Interfacing
- 8. Communication
- 9. Real time operating system concept
- 10. Introduction to Ucos II RTOS
- 11. Programmable logic controllers (PLCs)
- 12. Revision
